Figure 2 shows the effect of the concentration of the monomer on the polymerization of 2-methyl-2-butene. The polymerization rate increases with increasing monomer concentration, and the polymer yield increases with increasing monomer concentration. The polymerization rate and polymer yield are higher at 100°C than at 80°C. The polymerization rate and polymer yield are higher at 100°C than at 80°C. The polymerization rate and polymer yield are higher at 100°C than at 80°C.
